

Steamate* NA0240E

Neutralising amine for boiler applications.

Statement

With this statement we confirm that the neutralising amine "Steamate NA0240E" is made from components suitable for use in the preparation of steam that will contact food.

We regard the ingredients of Steamate NA0240E as boiler water additive and permitted for use in the production of steam according the following regulation:

FDA

All ingredients meet 21 CFR 173.310

The quantity of Steamate NA0240E used in steam is approved up to max. of 26 ppm, and the amount of steam in contact with food does not exceed that required to produce the intended effect in or on the food.

In any case the amount added shall not exceed the amount necessary to obtain the intended technical effect.

This statement is valid except for changes in the FDA Regulations.
